

Drugs and Alcohol Policy

Statement

Hampsey Ltd recognises that alcohol and drug abuse related problems are an area of health and social concern. The Company also recognises that alcohol and drug abuse problems can have a detrimental effect on work performance and behaviour.

It is therefore Hampsey Ltd policy that staff may not bring or consume alcohol or any unlawful drugs in the workplace during work time or during a period where the effects may carry over to the workplace. This includes business functions where the employee is representing the Company. Special rules may apply in relation to alcohol; where the company sponsors an event for staff, e.g. a Christmas party or when alcohol is gifted with the purpose of its consumption being off-site. In these circumstances, any variation to the no-alcohol policy will be communicated in advance of the event.

Hampsey Ltd recognises that a member of staff with an alcohol or drug dependency problem(s) needs help and support from their employer, however, the Company also understands that it has a responsibility to all its employees and other stakeholders to ensure that any risks related to this are minimised.

Accordingly, Hampsey Ltd's policy involves two approaches:

1. Providing reasonable assistance to the member of staff with an alcohol or drug abuse problem who is willing to co-operate in treatment for that problem.
2. Disciplinary rules, enforced through Disciplinary Procedures, where use of alcohol or drugs (other than on prescription) affects performance or behaviour at work and where either (1) an alcohol or drug dependency is not recognised or (2) where treatment is not possible or has not succeeded.

The Company does not have the internal resources to provide or arrange treatment or other forms of specialist assistance. Such services are provided by GPs, hospitals and other agencies. Through this policy, the Company will seek both to support a member of staff during such specialist help and, as far as possible, to protect their employment.

1.0 Assistance for a Member of Staff

1. The Company will, where possible, provide the following assistance to a member of staff:
 - Support during a period of treatment. This may include a period of sick leave or other approved leave, continuation in post or transfer to other work, depending upon what is appropriate in terms of the staff member's condition and needs of the Company.
 - The opportunity to remain or return to work following the completion of a course of treatment in either the employee's own post or, where applicable, an alternative post.
2. The Company's assistance will depend upon the following conditions being met:
 - The Occupational Health Service/Company-Approved Doctor (or, where appropriate, the individual's GP or other appropriate professional) diagnoses an alcohol or drug dependency-related problem.
 - The member of staff recognises that they are suffering from an alcohol or drug dependency problem and is prepared to fully co-operate in referral and treatment from appropriate sources.
3. Hampsey Ltd and its employees must recognise the following limits to the assistance the Company can provide:
 - Where a member of staff fails to co-operate in referral or treatment arrangements, no special assistance will be given and any failure in work performance and behaviour will be dealt with through the Disciplinary Procedure.
 - In the process of referral and treatment is completed but is not successful and failure in work performance or behaviour occurs, these will be dealt with through the Disciplinary Procedure.

- A member of staff's continuation in their post or an alternative post during or after treatment will depend upon the needs of the Company at that time.

2.0 When Disciplinary Action Will Apply

1. In line with the Company's disciplinary rules, the following will be regarded as serious misconduct:
 - Attending work and/or carrying out duties under the influence of alcohol or drugs.
 - Consumption of alcohol or drugs whilst on duty (other than where prescribed or approval has been given).
2. Breach of these rules will normally result in summary dismissal and only in exceptional cases will either notice or the reduced disciplinary action of a final written warning be applied.
3. Where a breach of these rules occurs, but it is an established alcohol or drug dependency-related problem, and the member of staff is willing to co-operate in referral to an appropriate service and subsequent treatment, the Company will suspend application of the Disciplinary Procedure and provide assistance as described above. Staff who do not comply with the treatment suggested or continue to abuse alcohol or drugs will be subjected to the application of the Disciplinary Policy.

3.0 Procedures Which Will Apply

1. Alcohol or drug dependency related problems can come to the notice of management through:
 - Failures in work performance or behaviour necessitating possible use of the Disciplinary Procedure e.g. a member of staff smelling of alcohol at work. In such situations, the procedure below will be followed.
 - Other means where a member of staff seeks or agrees to accept assistance on a voluntary basis and informs the Company management.
2. These procedures define management responsibilities and provide guidelines on:
 - Where assistance to a member of staff should be provided and the nature of an limits to such assistance.
 - The application of the Company's Discipline Procedure.
3. Through the Occupational Health Service/Approved Company Doctor (or, if appropriate, through the individual's GP or other appropriate professional), the Company will provide:
 - Confidential advice and support to the managers and supervisors of the individual on:
 - Whether an alcohol or drug-related problem exists.
 - Progress in treatment.
 - Re-establishment or continuation at work of the member of staff or other appropriate arrangements.
 - Any requested assistance to the member of staff concerned where this is practicable and reasonable in the circumstances.
4. This does not include directly providing treatment or specialist help which is the responsibility of GPs, hospitals and other agencies working in their field.

3.1 Situations Where Use of the Disciplinary Procedure is Appropriate

1. Abuse of alcohol or drugs can affect performance and behaviour at work, i.e. either through serious misconduct at work (where there is a direct and demonstrable breach of the disciplinary rules regarding alcohol or drug abuse at work) or where there is a falling off of standards of work performance or behaviour and abuse of alcohol and drugs is a possible cause.
2. The immediate Supervisor or Line Manager will be responsible for responding to such situations; carrying out either counselling or disciplinary investigations and interviews, supported (as appropriate) by a more Senior Manager.

3. In such interviews the possible existence of an alcohol or drug abuse problem should be explored. The manager is not required to diagnose the existence of an alcohol or drug abuse problem but merely to assess whether such abuse is a possible factor.
4. Any requirements of the Disciplinary Procedure regarding allowing the member of staff any representation will be observed.

3.2 Determining the Existence of an Alcohol or Drug Abuse Problem

1. Should the interviews lead to the conclusion that an alcohol or drug abuse problem might exist and the member of staff accepts referral, the manager should refer the matter to the Occupational Health/ Company-Approved Doctor (or, if appropriate, through the individual's GP or other appropriate professional), who will be responsible for establishing whether or not a diagnosis of alcohol or drug dependence can be made.
2. Disciplinary action should be suspended until diagnostic advice is obtained, however, if appropriate, immediate suspension arrangements in the Disciplinary Procedure may be followed.
3. If the interview fails to lead to the conclusion that an alcohol or drug abuse problem exists or the member of staff rejects or fails to co-operate in referral then disciplinary action should be continued where, and as, the situation justifies.

3.3 Confirmation that an Alcohol or Drug Abuse Problem Exists and Treatment Arrangements

1. If a positive diagnosis of an alcohol or drug dependency problem is made, and the member of staff agrees to co-operate, then treatment should commence.
2. Where necessary, either the Occupational Health/Company-Approved Doctor (or, if appropriate, the individual's GP or other appropriate professional) will advise the member of staff regarding treatment and will be responsible for monitoring progress with this treatment.
3. Hampsey Ltd will request a regular update on the individual's progress from the medical professional concerned (the employee must agree to this). The advice should be available at least monthly following commencement of treatment and thereafter as appropriate. In the meantime, disciplinary action should be discontinued unless the member of staff fails to co-operate with the treatment arranged. Should a diagnosis of alcohol or drug dependence not be confirmed (or the employee refuses to co-operate), the Company will review the facts and consider whether or not there needs to be a return to the use of disciplinary action.
4. Where certificates are submitted, sick leave should be given. Should the employee continue to be fit for work during the period of treatment, they should be permitted to continue in their post or alternative work unless such an arrangement would have an adverse effect on Company services. In such circumstances, annual or unpaid leave should be approved or, exceptionally, suspension arranged.
5. If a member of staff has been off work during the period of treatment, before returning to duty, he/she will be seen by the Occupational Health Service / Company-Approved Doctor, or a report sought from the individual's GP to advise management regarding capability for continuation in his/her own post and whether any special supervision or other arrangements are required.
6. Every effort should be made to comply with the advice provided. If it is not reasonably practicable to do so and, as a result, the member of staff is not able to resume duty, employment may be terminated on the grounds of incapacity (ill health).
7. If a member of staff is again involved in disciplinary situations resulting from alcohol or drug abuse related problems, a second referral to the Occupational Health Service/Company-Approved Doctor and suspension of the disciplinary procedure may be appropriate. If they advise positively on the possibilities of further treatment or help, and the willingness of the employee to co-operate, the disciplinary procedure may be suspended again to permit treatment and help to be undertaken. The second referral will not apply if the further disciplinary problems involve serious misconduct. Third and subsequent referrals are not permissible.

3.4 Situations Where a Disciplinary Situation Does Not Exist

1. There may be situations where the possible existence of alcohol or drug abuse problems affecting a member of staff come to a manager's attention although there is, or has been, no discernible effect on

work performance of behaviour. This could arise if a member of staff confides in their manager about an alcohol or drug abuse problem or a manager could see a need to approach the employee after observing possible “indicators” of an alcohol or drug abuse problem, e.g. an absence pattern, information provided by the employee’s colleagues etc..

2. In such situations, Hampsey Ltd would wish staff to feel that they can seek help from their employer (in complete confidence) without worry that their job security would be in jeopardy. Accordingly, if managers are faced with a situation of this type they should:
 - Seek the advice of the Occupational Health Service/Company-Approved Doctor or other appropriate professional regarding how the matter should be dealt with.
 - Discuss the situation with the employee and, if appropriate, arrange for the member of staff to be interviewed by the Health Professional.
 - As in the procedure described above, the Health Professional will play a facilitating role in seeking to establish whether a problem exists and advising and directing the member of staff towards appropriate forms of treatment and help.
3. These steps cannot be taken without the co-operation of the member of staff. If the member of staff does not wish to co-operate, no further action should be taken. There are, however, a number of external organisations which provide help and support for individuals with an alcohol or drug related problem.
4. Should a member of staff take-up the opportunity of assistance on this voluntary basis, there need be no further formal involvement of management in terms of action or right to learn of progress with treatment. It may be, however, that the member of staff would wish, or agree to, further involvement of management as a means of assisting progress with treatment.
5. Use of the disciplinary procedures and/or the application of the approach described above would only be appropriate if, subsequently, the member of staff is involved in a breach of Company rules.
6. Should the problems of the member of staff develop to an extent that their continuation in post or employment became impossible, it may be necessary to identify alternative work or arrange for termination on the same basis as the company operates for stand with problems of incapacity due to ill-health.

4.0 Drug and Alcohol Testing

1. Hampsey Ltd will ensure that all of its employees work within the laws of the land. The U.K. laws on use of drugs and alcohol are clear:
 - It is a criminal offence for certain worker, such as drivers or operators of public transport systems, to be unfit their work due to taking drugs or alcohol.
 - It is a criminal offence to be unfit to drive, attempt to drive or be in charge of a motor vehicle when under the influence of drugs or alcohol.
 - The possession, supply or production of controlled drugs is unlawful except for in special circumstances (e.g. when they have been prescribed by a doctor).
 - Employees are also legally required to take reasonable care of themselves and to behave in a way that does not pose risks to the health and safety of themselves or others in the workplace. This includes consideration of the effects that intoxication through consumption of alcohol or drugs may have.
2. In order to ensure compliance with the law, Hampsey Ltd will undertake drug/alcohol testing for certain key jobs within the Company. These will be carried out pre-employment as part of a random testing scheme or as a result of an incident. These jobs are:
 - Hampsey Ltd does not currently have any roles which legally require a drug/alcohol test.
 - Hampsey Ltd reserves the right to test operatives working on behalf of the Company (e.g. via a subcontractor agreement) where the competence of the operative is essential.
 - Individuals in these posts will be asked to agree to testing as part of their contract of employment.
3. To ensure the testing is legal and safe the following arrangements will apply:

- Testing will only be carried out as part of this policy and only by trained staff who will carry out the test in a non-invasive way — usually by urine sample, exhalation, hair strand or oral drug testing.
 - Samples to be collected under supervised conditions but respecting human dignity. Two identical samples are taken either on site or split in the test laboratory.
 - Samples to be kept under “Chain of Custody” at all times.
 - Screening test for alcohol/common drugs to be carried out on one sample with either positive or negative results.
 - Any positive results from screening to be confirmed by approved scientific techniques.
 - Results to be reviewed by an expert and reported back.
 - Second sample to be kept for further analysis as part of any appeal by the employee.
 - Confidentiality will be maintained at all times.
4. Hampsey Ltd believes that effective workplace drug and alcohol policies are a better way of achieving results than drug and alcohol testing and that providing an environment where employees can discuss any drug or alcohol problems they have, with the prospect of gaining help and support, will be more effective than a testing regime. Therefore, the undertaking of drug/alcohol testing in the workplace will be minimal and used only where the Company has a reasonable belief that drug or alcohol abuse would create a serious safety issue.

This statement will be reviewed and updated as necessary on at least an annual basis. Accountability for the compliance of this statement rests with the Managing Director.
